Great Futures Start with a Great Education.

Why do our kids need Coloradans to invest more in education?

Colorado is already well behind the national average:

$1,682 below the national average in K-12 per pupil spending (2007-08)
48th in higher education spending per capita (2008-09)
Bottom 10 states in student-teacher ratios, technology in classrooms.

Our kids & families *cannot* afford any more cuts:

2009-10: Cut average of $140 per P-12 student
2010-11: Cut average of $440 per P-12 student
2011-12: Expected average cut of $345 per P-12 student
2011-12: Expected average cut of $877 per higher ed student

greatedaction.org
greatfuturescolorado.org

Concerned that education cuts will keep getting worse?
Sign the petition to give voters a chance to stop deep cuts to schools, colleges, and universities.

This initiative would:

- Return personal income, corporate income and sales tax rates back to 1999 levels, temporarily — for five years.
- Raise about $500 million for education — early childhood through higher ed.
- Wouldn't "fix" Colorado's long-term disinvestment in education, but would prevent deep cuts & provide a bridge to a long-term fiscal fix.

BOTTOM LINE:
Our Kids Can't Wait!
